Geminus II Seed & Super Bin

45T Geminus

45T at Harvest

Meet GrainKing Geminus II

The most efficient grain and fert handling equipment on the market.

Designed, Engineered and Manufactured by GrainKing, Geminus Seed & Super bins have been the Aussie farmer's first choice for over 40 years. Beginning in 1962 and solely manufacturing grain bins since 1981, GrainKing has decades of experience in creating the safest, most efficient and durable Seed & Super bins on the market. From hydraulic steering to internal walkways, everything is included after years of talking to farmers, implementing their advice and understanding their needs.

**BACKING
EVERY
HARVEST**

Speed and Efficiency

Standard larger Augers paired with hydraulic flow doors and quick PTO/Hydro options make the Geminus one of the fastest bins in the field.

Larger Auger

Twin 18" standard Augers on GrainKing Geminus II Seed & Super bins allows for maximum unload speed with seeding trunks included as standard.

Hydraulic Flow Doors

50/50 split full length hydraulic grain flow doors allows for ultimate control and grain flow.

PTO/HYD and HYD/HYD

Don't have PTO? Upgrade from our standard PTO/HYD to a full HYD/HYD drive option or if your looking for greater control over unload speed when seeding.

PTO/PTO option not available for Seed & Super bin!

60T With Fire Fighter Units, Float Tyres, Tow Hitch, Central and rear Ladders

Our Most Feature Packed Bin Yet

A superb range of features for a superb bin

The latest version of our GrainKing Seed & Super Bins, the Geminus II, is jam packed full of features to make our bins more practical, safe and efficient. A **floating cushioned drawbar** keeps the ride smooth and allows for height adjustment. A **hydraulic swinging vertical lift jack** makes hitching and storing your bin a simple and efficient process with the ability to remove it via two pins. A hand driven **roll tarp** keeps your grain safe from wet conditions and a **50/50 split full length cleanout door** setup and **sample chute** allows for quick and easy grain removal. A **standard overrun clutch** for your discharge Auger saves wear and tear on your equipment. Go all out and upgrade this to an **electronic clutch** to also avoid damage on your floor Auger linkages. **Side ladder** is now standard along with **3 x cameras** for easy viewing. **Zero contamination** between the two compartments with **stainless floors and discharge Auger barrels**. Remove the centre dividing wall and **use your Seed & Super as a Chaser Bin** during harvest!

35T Spouts and Float Tyres

Unload with Ease

5.56m discharge height for clearance, adjustable poly spouts, standard hanging seeding trunks and the ability to unload one auger at a time for ultimate control over your unload.

Brakes and Safety

Every GrainKing Geminus II is manufactured with brakes as standard. Lights and 3 x cameras, oversize signs, tail lights and flashing beacons are all standard Geminus II safety gear.

Easy Maintenance

Geminus's maintenance is quicker than ever with minimal grease points and greaseless bushings used in critical locations. Folding front and rear access doors, side ladder and internal walkways enables safe and efficient cleanout.

Suspension & Undercarriage

Tandem and tri axle models have load sharing leaf spring suspension as standard. Tandem models have front steering axles and Tri models are kitted with front + rear steering axles to increase turning circle while minimising soil disturbance and compaction.

Strength and Durability

A combination of welded and riveted design

GrainKing's combination of a **riveted and welded Seed & Super bin design** boosts manufacturing efficiency and product strength. The rivets allow for quick, precise assembly, reducing production time and allowing for more consistent quality manufacturing. The **T-bar modular welded design** reinforces key stress points and eliminates the need for internal bracing while simplifying the design. Additionally, our **reinforced floating cushioned drawbar** ensures a steady ride, offering superior robustness over our competitors. A **roll tarp** and **folding steel raincaps** that **open and close upon lift Augers opening and closing** for full protection from the weather. Up to 10mm **thick auger flightings** further enhances durability, ensuring a longer lifespan and less maintenance over each bin. A twin compartment bin able to **hold seed and fertiliser at the same time with zero contamination** between the two. **Stainless steel floor plates and stainless discharge Auger barrels** ensures corrosion is minimised from fertiliser use. This combination results in a strong, efficient, and reliable chaser bin built to withstand heavy-duty agricultural use.

5 YEAR STRUCTURAL WARRANTY!

Easy and Efficient Cleanout

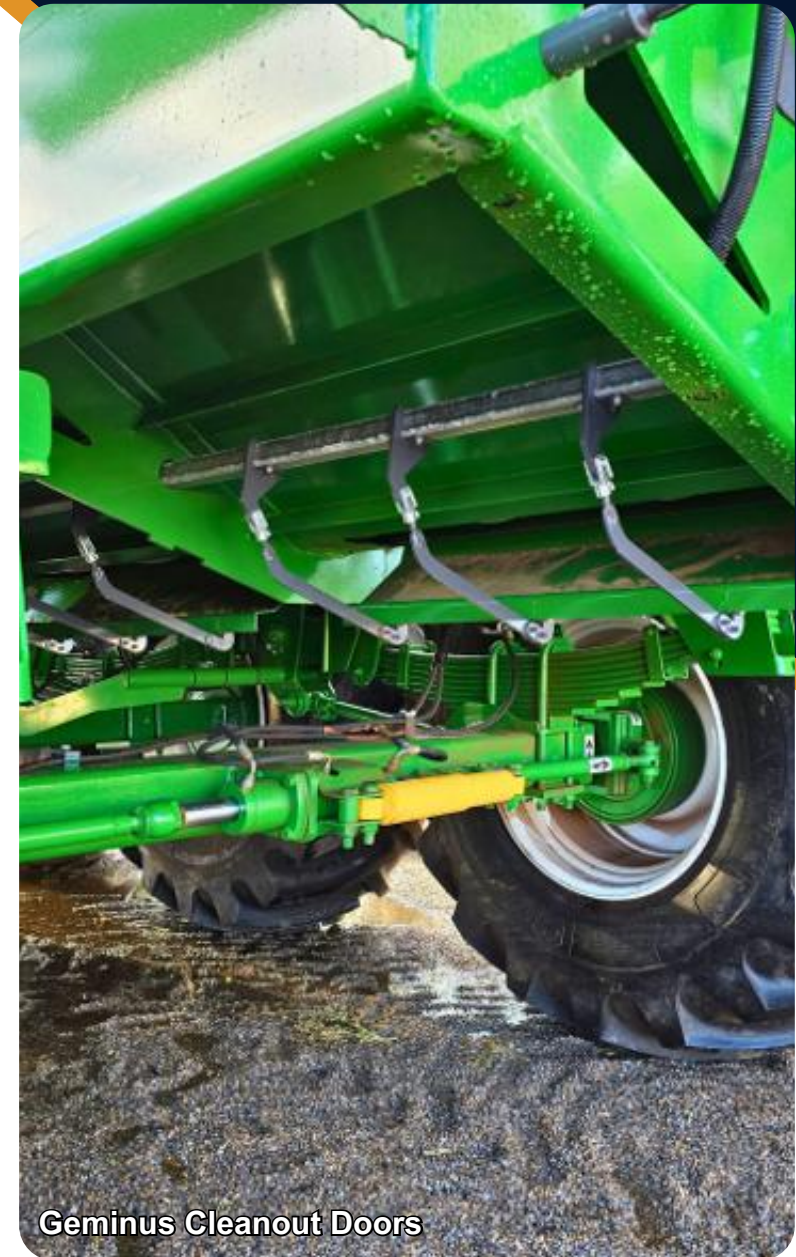

Swinging cleanout doors, access doors and zero clutter internal design

Internal Structure of Geminus - One Half. Trunks Inside for Transport

We've made cleanup a satisfying experience

GrainKing's Seed & Super bin cleanout has never been easier or more efficient, thanks to innovative design features implemented after gathering valuable customer feedback over the years. The **50/50 split cleanout doors** provide quick and easy access to the bin's interior with **one handle opening every door**, allowing for hassle-free removal of any remaining grain. **Internal walkways and zero internal crossbars** ensure safe and convenient movement inside the bin, enhancing operator safety and efficiency during the cleanout. A **removable centre wall** enables full access to the interior when hosing down the bin. Additionally, the **flip-up front and rear access doors** make it simple to access the inside of the bin, further improving the speed and ease of the process. The standard **centre fold down ladder** allows for easy access for maintenance and cleaning of Augers. A **full height rear ladder** can also be added as a secondary access point. These design elements created with input from real-world users make GrainKing's Seed & Super bin the ideal choice for farmers today.

Geminus Cleanout Doors

Zero Contamination

Split compartments, stainless steel and independent flow doors for zero contamination between Fert and Seed

GrainKing's Seed & Super bins ensure there is **zero contamination** between your fertiliser and seed during seeding season. **Corrosion is kept to a minimum** due to our **stainless steel floors** and **discharge barrels**. Features such as the Geminus being a **split compartment bin**, with a single full length floor Auger and **50/50 split flow doors** that are **controlled independently** allow you to unload **just your Fert, seed or both** when carrying only seed etc. There is also an available option of a **drop in 10,000L liquid Fert tank** that further keeps the risk of contamination at zero when using liquid Fertiliser. **Avoid spills and overfilling** seeding carts with control over our full length hydraulic floor Auger, electric adjustable flow doors and seeding trunks. Adjustable spouts allow you to fill seeding carts and trucks from a safer distance. The centre **dividing wall** is able to be **removed** during the cleaning process of the bin to help keep your Geminus free of left over Fert or when the bin is in use as a Chaser Bin.

Stainless Auger Barrels - Rain Caps Close When Augers are Down

Seed, Fert and Liquid Fert With Zero Contamination

Your Controls in One Place

Our standard hand held remote makes bin unload a one man job

Adjustable Poly Spout & Lights/Cameras/Beacons

Our adjustable poly spout is controlled from inside or outside your cab using one multifunctional remote. Lights/cameras and beacons are also switched on and off from your cab.

Auger Unfold

The twin 18" Augers are hydraulically unfolded from your remote eliminating the need to exit the machine or get back in the machine.

Hydraulic Grain Flow Doors

Our internal 50/50 split full length grain flow doors are electronically opened and closed from your remote for total grain flow control.

Hydraulic Floor Auger

When setup with a HYD/PTO or full HYD setup, our floor auger is controlled from the cab via our remote and can be sped up or slowed down based on the hydraulic flow.

Seed & Super bins do not have a full PTO option!

Multifunctional remote

Supplied viewing screen with remote

Full Hydro

Full Hydro is your go to if your tractor does not have PTO or if you would like greater control over filling your seeding carts.

Max unload speed will decrease with a Full Hydro setup!

35T With Fire Fighter Units

Operating Remotely

Your bin controlled from your hand

What It Is

Required to operate a GrainKing Seed & Super bin is our standard **hand held remote control**. This enables total control over your bin from inside and outside the operating cab of your tractor.

What it does

Our hand held remote is required to operate the bin. It allows the operator to **unfold the discharge Augers, start up the sweep and lift Augers, open up the grain flow doors** and **adjust the poly spouts** when the bin is in use.

Key Benefits

- Bin is operated from a central control point
- Split compartments controlled separately on the one remote
- Less wasted time and money during harvest operations
- Improved farm efficiency
- Shows percentage onscreen of how open the grain flow doors are
- Control your bin while standing on your Air Cart etc.

Things to Keep In Mind

- Tractor does need to be turned on and running so hydraulic power is supplied to bin
- Total control is available to PTO/HYD and HYD/HYD setups. **Full PTO option is not available for GrainKing Seed & Super bins**
- Training may be required to use the full extent of the remotes capabilities
- In cab hydraulic controls are not useable and all functions are completed with the remote

Remote Control

Personalise Your Geminus II

Choose from a broad range of options to create your perfect Seed & Super Bin

Our Options

1. Scales Paired With Libra Cart Control
2. HYD/PTO and Full Hydro Drive Options
3. Float Tyre Upgrade
4. Fire Fighter - 2 x 400L (Petrol or Hydraulic driven)
5. Fire Extinguisher - 9L with Brackets
6. 10,000L Drop in Liquid Fert Tank
7. Rear Ladder
8. Electronic On/Off Clutch

[Refer to Page 11 for Further Details]

Personalise Your Geminus II

Choose from a broad range of options to create your perfect Seed & Super Bin

Our Options (Extended)

- 9. Windows - Not Standard
- 10. Custom wheel Centres
- 11. Tow Hitch
- 12. Track Option

A Range of Models to Suit Your Farming Operation

Choose Your Model

Volume	Axle Type	Tonnage	Minimum HP Required
32,000L	Single Axle	25T	200HP
46,000L	Tandem Axle	35T	250HP
56,000L	Tri Axle	45T	350HP
75,000L	Tri Axle	60T	470HP

Quality Product Service and Delivery

We service and deliver the best Seed & Super bin all over Australia

5 year structural warranty

GrainKing's 5 year structural warranty provides peace of mind that your bin will stand the test of time through all farming conditions. If your bin experiences a manufacturing structural defect you can be assured we will be there to assist you with repair or replacement.

Australia Wide

GrainKing has the ability to transport your new Seed & Super bin to any corner of Australia. With offices in QLD and WA our service and sales team are there to support you. All manufacturing is completed in WA. GrainKing's Dealers are spread far and wide over Australia.

Our Offices

QLD 40 SOWDEN ST, DRAYTON,
TOOWOOMBA QLD 4350

WA 22 WITTENBERG DR, CANNING VALE
WA 6155,
7 WEST MAIN ST, CUNDERDIN WA 6407
HOURS: MON - FRI 8AM - 4:30PM
